

LAMINIS

FE Design

CONCEPT

L'obiettivo dei designer FE Design per questo progetto è stato quello di creare un oggetto per disegnare lo spazio con la luce. Le singole formelle, combinate tra loro come le tessere di un mosaico prezioso, creano strutture luminose poliedriche, che arricchiscono in maniera discreta ogni ambiente aprendo nuovi scenari per qualsiasi progetto architettonico. Questa è la caratteristica principale di Laminis: la naturalezza con cui si sovrappone armonicamente allo spazio esistente, creando infinite trame di luce. Grande attenzione è stata data alla produzione dei vetri, che vengono realizzati interamente a mano da maestri vetrai colando il vetro fuso e successivamente pressandolo secondo disegni stabiliti. L'eventuale coloratura avviene spargendo scaglie colorate sul piano di lavoro.

In this project, the aim of the designers at FE Design was to create an object that would design space with light. The single tiles, combined together like a precious mosaic, create multi-sided luminous structures discretely enriching each ambient and opening scenarios for any architectural project. This is the main characteristic of Laminis: its casual, harmonious overlapping of existing space creating infinite light weaves. Great attention was placed on the production of the glass panels, that are made entirely by hand by master glass-makers, with melted glass which is moulded and form the set designs. Colour is added where needed by scattering coloured flakes on the work surface.

El objetivo de los diseñadores FE Design para este proyecto es crear un objeto para diseñar el espacio con la luz. Las placas individuales, combinadas entre sí al igual que las piezas un mosaico precioso, crean estructuras luminosas poliédricas, que enriquecen discretamente todos los ambientes y abren nuevos escenarios para cualquier proyecto arquitectónico. Ésta es la característica principal de Laminis: la naturaleza con la que se superpone armónicamente en el espacio existente para crear tramas de luz. Se ha prestado una gran atención a la producción de los elementos de vidrio, que se realizan totalmente a mano por parte de maestros vidrieros al vaciar el vidrio fundido que, posteriormente, es prensado según diseños establecidos. El color se obtiene al esparcir escamas de color en la superficie de trabajo.

Das Ziel der Designer FE Design für dieses Projekt war die Erschaffung eines Gegenstands, um den Raum mit Licht zu zeichnen. Die einzelnen, untereinander wie ein wertvolles Mosaik verbundenen Leisten bilden polyedrische Leuchtstrukturen, die jede Umgebung diskret bereichern und in jedem architektonischen Projekt neue Szenen eröffnen. Das ist die Haupteigenschaft von Laminis: Die Natürlichkeit, mit der sie sich harmonisch im bestehenden Raum einfügt und unendliche Lichtmuster erzeugt. Eine hohe Beachtung wurde der Produktion der Gläser geschenkt, die vollständig von Glasmeistern von Hand verwirklicht werden, indem flüssiges Glas gegossen und daraufhin nach festgesetzten Zeichnungen gepresst wird. Die eventuelle Färbung erfolgt durch Zerstreuen von farbigen Splittern auf die Arbeitsfläche.

Pour ce projet, les designers FE Design ont poursuivi l'objectif de créer un objet pour dessiner l'espace avec la lumière. Tous les carreaux, combinés entre eux comme les tesselles d'une mosaïque précieuse, créent des structures lumineuses polyédriques, qui enrichissent discrètement toutes les pièces en ouvrant de nouveaux horizons à tout projet architectonique. Voilà la caractéristique principale de Laminis: le naturel avec lequel elle se superpose à l'espace existant, tout en créant des jeux de lumière infinis. Une grande attention a été dédiée à la production des verres qui sont entièrement réalisés à la main par des maîtres verriers en coulant le verre fondu, puis en le pressant conformément aux dessins établis. Les éventuelles touches de couleur sont appliquées en disséminant des éléments colorés sur la table de travail.

При работе над проектом Laminis целью дизайнеров FE Design было создание предмета, разделяющего пространство собственным светом. Отдельные пластины, собранные вместе как драгоценная мозаика, создают многогранные структуры света, которые сдержанно обогащают любое пространство и открывают новые горизонты для архитектурных проектов. Это и является главной характеристикой Laminis: естественность, с которой он заполняет пространство, создавая бесконечные текстуры света. Большое внимание уделено производству стекол, мастера-стеклодувы выливают жидкое стекло на поверхность и оттискивают пресс-формы с выбранными узорами. Покраска, при необходимости, происходит разбросом цветной стружки на рабочей поверхности.

LAMINIS

FE Design

La collezione si costituisce di sospensioni in due misure diverse e di strutture componibili in metallo da soffitto e parete per interno. Le soluzioni compositive sono illimitate e personalizzabili, a due o un velo elettrificato o ad un velo non elettrificato. Le sospensioni sono in metallo cromato lucido e dorato, le barre modulari sono disponibili con rivestimenti in alluminio brillantato e alluminio dorato. Cavi in acciaio inox sorreggono i vetri, di diverse misure e fantasie, che, su richiesta, sono disponibili anche in colorazioni diverse..L'elettrificazione è a tensione di rete per lampade alogene e per LED.

La colección está constituida por lámparas colgantes de dos tamaños distintos y por estructuras modulares de metal para techo y pared de interior. Las soluciones de composición son ilimitadas y personalizables, con dos cortinas de vidrio o una electrificada o con una cortina de vidrio no electrificada. Las lámparas colgantes son de metal cromado brillante y dorado, las barras modulares están disponibles con revestimiento de aluminio abrillantado y aluminio dorado. Cables de acero inoxidable soportan los elementos de vidrio, con distintas medidas y fantasías, que, bajo pedido, existen también en colores diferentes..La electrificación es con tensión de red para bombillas halógenas y para LED.

Die Kollektion besteht aus Hängelampen in zwei verschiedenen Abmessungen und zusammensetzbaren Strukturen aus Metall für die Wand- und Deckenausführung für Innenbereiche. Die zusammensetzbare Lösungen sind unbegrenzt und individuell gestaltbar, mit zwei oder einer elektrifizierten Glaswand oder einer nicht elektrifizierten Glaswand. Die Hängelampen sind aus glanzverchromten und vergoldetem Metall, die modularen Stangen sind mit Beschichtungen aus poliertem Alu und vergoldetem Alu erhältlich. Kabel aus Edelstahl halten die Gläser in verschiedenen Abmessungen und Mustern, die auf Wunsch auch in unterschiedlichen Farben erhältlich sind. Die Elektrifizierung erfolgt über Netzspannung für Halogen- und LED-Lampen.

The collection is composed of hanging lamps in due sizes and modular ceiling and wall lamp models for indoor use, with a metal structure. The possible layouts are endless, and may consist of one or two electrically powered "veils", or just one "veil", without electrical power. The hanging lamp models are in polished chrome / gilded metal; the modular strips are available in either polished or gilded aluminium. The glass panels, in different sizes and patterns, are supported by means of stainless steel cables, and are also available in different colours on request. The lamps run on mains power and are suitable for halogen and LED bulbs.

La collection est constituée par des suspensions en deux dimensions différentes et de structures modulables en métal pour plafond et par des appliques pour intérieur. Les solutions de compositions sont illimitées et peuvent être personnalisées à deux ou un voile électrifié ou à un voile non électrifié. Les suspensions sont en métal chromé brillant et doré, les barres modulaires sont disponibles avec des revêtements en aluminium brillant et doré. Des câbles en acier inox supportent les verres, de diverses mesures et fantaisies, ils sont également disponibles avec différentes couleurs. Les lampes halogènes et LED sont alimentées par la tension du réseau.

Коллекция состоит из подвесок двух размеров и металлических структур для крепления к потолку или к стене, для внутренних помещений. Неограниченные возможности композиции и уникального монтажа, возможность выбрать между одинарной или двойной завесой из электрифицированных пластин или одинарной завесой из неэлектрифицированных пластин. Подвески из блестящего хромированного и позолоченного металла, модульные перекладки из полированного или позолоченного алюминия. Тросы из нержавеющей стали держат стекла разных размеров и с разными узорами, которые могут производиться также в разных цветах. Электрическая часть рассчитана на галогеновые и светодиодные лампы от сетевого напряжения.

LAMINIS

Sorgente: GU10 / Light source: GU10

Configurazione: 1 o 2 pareti / Layout: 1 or 2 glass walls

1. Scelta barra e angoli / Metal bar and angle option

1a. Barre lineari / Linear bars

Lunghezza minima 30 cm
Modularità ogni 30 cm
Elettificazione ogni 30 cm
(2x50W GU10).

Su richiesta sono disponibili elettificazioni diverse.

Ogni sistema deve prevedere l'utilizzo di un modulo da 30 cm di partenza.

I moduli starter sono moduli cablati per l'alimentazione di partenza.

Minimum length: 30 cm

30 cm modularity

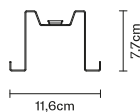

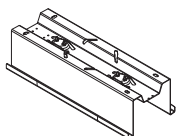

Electrification every 30 cm (2x50W GU10).

Different electrification are available on request.

Each system has to use a 30 cm starter module.

The starter modules are electrified.

Infinite possibilità

DIMENSIONE VETRI GLASSES DIMENSION

La larghezza di tutti i vetri parte da una base di 30 cm/11 3/4" e si sviluppa in multipli.

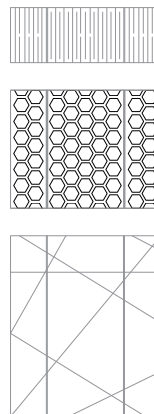

The various glasses must have a width of 30 cm/11 3/4", or multiple, although they have different sizes.

DISEGNO PERSONALIZZATO DESIGN IT YOUR SELF

C'è la possibilità di scegliere tra le lavorazioni grafiche del vetro da noi proposte oppure possiamo produrre il motivo grafico disegnato da te.

You can choose one of our glass patterns or you can create your own design and we'll produce it for you.

* Fattibilità dei disegni da verificare in base al processo produttivo vetrario.

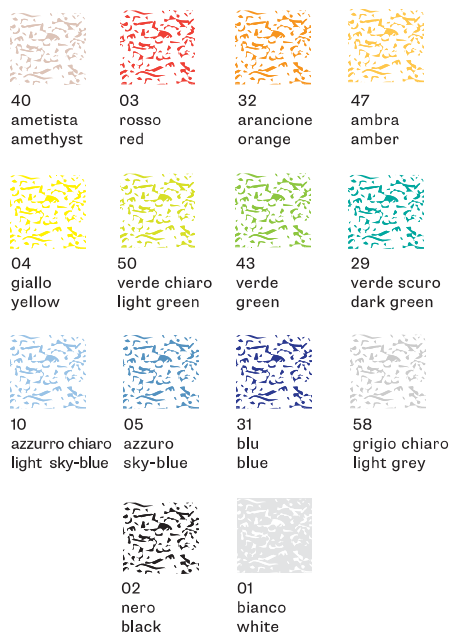

Feasibility of the designs to be verified according to the glass production process.

Endless Possibilities

COLORAZIONE COLOUR

C'è la possibilità di personalizzare la finitura cromatica dei singoli vetri scegliendo tra quelli qui indicati.

Possibility to choose the colour finishing of the single glasses among those described here.

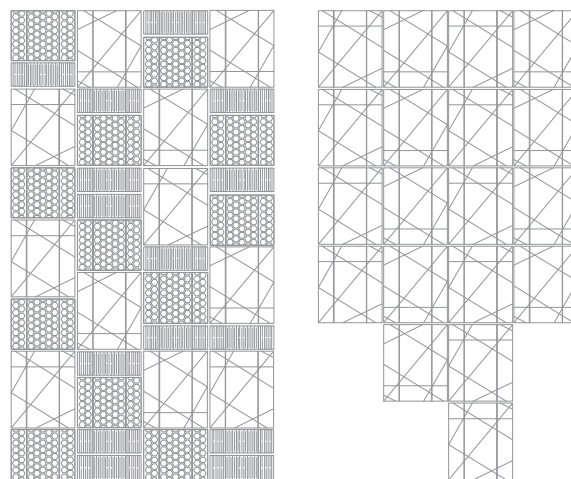

* Gli stessi colori, fatti a mano, potrebbero subire delle variazioni.

The same colours, handmade, could change.

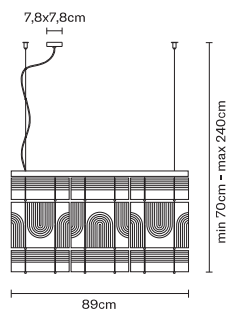

DISTRIBUZIONE ARRANGEMENT

C'è la possibilità di scegliere la distribuzione dei singoli vetri.

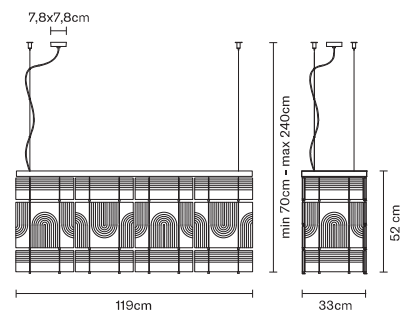

Possibility to choose the arrangement of the single glasses.
