

F68 Etnia Pendant Lamp

Etnia is a collection of indoor pendant lamps with sound absorbing properties, consisting of panels made from recycled PET covered in coloured fabric. The black anodised aluminium structure has an upper diffuser in opaline PMMA (Polymethylmethacrylate) and a lower diffuser in micro-prismated PMMA. The panels are lined with sound-absorbing fabrics in various colours and are available with customised finishes. These colours and textures create an interaction with the light, giving it dynamism and helping to define a perfect synthesis between the technical world and the decorative world.

Voltage: 110-230V

IP Rating: IP40

Materials: Recycled PET, Aluminum

Protocol: On/Off, Push 1..10V, Phase out, Dali

Size: 90cm, 150cm

Version:

Strawberry Red, Sand Beige, Blue Jeans, Mustard, Reseda Green, Light Grey
